PROFESSIONAL SUMMARY

I'm a fourth-year B.Tech Information Technology student (CGPA 8.5+) with hands-on experience building and deploying machine learning systems, including a Data Science internship where I shipped forecasting APIs and an offline LLM inference module. I'm skilled across the ML lifecycle, from feature engineering and model tuning to Streamlit dashboards and production deployment. I'm looking for Data Science, AI Engineering, or Business Analyst roles where I can apply strong analytical thinking and self-driven learning to real-world problems.

EDUCATION

B.Tech in Information Technology | Expected July 2027

Maharaja Agrasen Institute of Technology (GGSIPTU), New Delhi | CGPA: 8.5+

Class 12th, N.C. Jindal Public School | Year of Passing: 2022

PROFESSIONAL EXPERIENCE

Data Science Intern, Vinove Software and Services | June 2025 - August 2025

- Engineered 2 ML models (Weather Forecasting and Market Prediction APIs via REST/FastAPI) using Python and Scikit-learn with time series and probability-based forecasting methods, reducing manual effort by approximately 40%.
- Deployed an Ollama-based local LLM into a Django/FastAPI backend for offline AI inference; delivered 3 data-driven modules across 4 agile sprints, communicating findings to stakeholders in a fast-paced environment.

Big Data Trainee, Samsung Innovation Campus | December 2025 - February 2026

- Selected for Samsung's competitive Big Data program; applied SQL and Hadoop to query, clean, and preprocess large-scale datasets, performing statistical analysis and probability-driven pattern identification.
- Conducted hypothesis-driven data analysis and structured data transformation on 3 real-world datasets; visualized trends using Matplotlib and Seaborn to communicate insights to non-technical stakeholders.

PROJECTS

Wildfire Spread Predictor

Python, Scikit-learn, XGBoost, LightGBM, Time Series, Streamlit

- Built a forecasting pipeline predicting 6-hour wildfire spread probability using an ensemble of Random Forest, XGBoost, and LightGBM; engineered 40+ features (Fire Weather Index, wind vectors, drought indices) from satellite and weather data.
- Tuned hyperparameters with 5-fold stratified cross-validation, evaluated via AUC-ROC and F1-score; deployed a live Streamlit dashboard for real-time risk prediction from adjustable weather and terrain inputs.

AI Job Market Disruption Analyzer

Python, Pandas, Scikit-learn, Linear Regression, Forecasting, Streamlit

- Built a forecasting system analyzing 7 years of Stack Overflow survey data (49,000+ developers); engineered a regression-based skill growth model and weighted statistical scoring framework, projecting technology demand through 2030 via an interactive dashboard.

Credit Card Fraud Detection

Python, Scikit-learn, Pandas, Gradient Boosting, SMOTE, Statistical Analysis

- Collected, cleaned, and statistically analyzed 100,000 transactions with a 98:2 class imbalance; engineered predictive features and applied SMOTE. Gradient Boosting achieved 99.64% accuracy, 97.75% recall, and ROC-AUC of 0.9996.
- Optimized decision threshold via probability-based tuning from 0.5 to 0.3, recovering 391 of 400 frauds and reducing projected losses by approximately \$200,000 versus a naive baseline; interpreted results via feature importance analysis.

Cabin Price Prediction Using Neural Networks

Python, TensorFlow, Regression

- Built a neural network regression model predicting real estate prices from property features (size, amenities, location proximity), replacing inconsistent manual valuation with data-driven pricing.

SKILLS

Languages and Libraries: Python, SQL, MySQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PyTorch, TensorFlow, XGBoost, LightGBM, OpenCV

Data Science and ML: Machine Learning, Deep Learning, ML Model Deployment, Statistics, Probability, Hypothesis Testing, Time Series Analysis, Forecasting, Regression, Ensemble Methods, Statistical Analysis, Data Analysis, Feature Engineering, Classification, Cross-Validation, Optimization

Tools and Frameworks: FastAPI, REST APIs, Django, Streamlit, Jupyter Notebook, Power BI, Git, Postman, Hadoop, Tesseract, LangChain

Soft Skills: Analytical Thinking, Effective Communication, Multitasking, Self-Learning, Inquisitive Mindset, Adaptability, Experimentation and Risk-Taking

Familiar With (Conceptual): PySpark, Snowflake, Optimization Problems (Linear/Nonlinear Programming, Heuristic Methods)

CERTIFICATIONS

Neural Networks and Deep Learning, Coursera (March 2026) • CRAC AI Security Summer Training (August 2025)

Machine Learning Fundamentals, Coursera (January 2025) • SQL Basics, Coursera (January 2025)

Python for Data Science, Coursera (September 2024) • Data Science Program, Masai x IIT Guwahati

EXTRA-CURRICULAR ACHIEVEMENTS

Entrepreneur Development Cell, Operations Lead

- Spearheaded operations for E-Summit 2025 as Student Coordinator and served as Core Member for E-Summit 2026, overseeing 10+ events, 15+ partnerships, and a 10-member team across both editions.

Outside Campus and Additional Training

- Participant, Climate Change Ideathon (IIT Delhi) and MindMaze Strategy Case Study Competition (DTU, Team Aikyam); completed Data Science Program, Masai x IIT Guwahati (Python, Statistics, SQL, EDA, ML).
